

# ACT TEST PREPARATION

## SIGN UP FOR CLASSES TODAY!!!

## LOCATED AT UCSD'S BARRETT ROOM

Our comprehensive ACT course offers lectures specifically tailored to each of the 4 multiple choice sections (English, Math, Reading, Science) and guided practice through the Writing portion of the exam. We focus on teaching the fundamentals of each section and coaching students through our proven test-taking strategies.

With a heavy focus on experience and exposure, we provide [over 5,000 practice problems](#) and access to [more than 20 practice tests](#) using our online student portal. This portal not only allows students and parents access to their progress and additional practice ACT tests, but it tracks and highlights specific areas of weakness based on the questions a student answers incorrectly. This allows us to focus on each student's individual weaknesses and turn them into strengths!

Unlimited Learning saved my son's freshman year in Algebra and is helping him with his ACT studies. Jacob is great at pairing the students with a tutor who has common interests and is relatable. Brian has been incredible. The prices are very reasonable and well worth the end result. I have recommended them and will continue to do so.

Hello,

My husband and I are both teachers and have been really impressed with Unlimited Learning. Jacob, the owner, did a wonderful job in pairing our son up with a tutor that he immediately connect with. His tutor Brian has been highly professional, flexible, and does a wonderful job explaining concepts in a manner that my son understands. I cannot say enough about this company and I would highly suggest it to others!

We have been working with Jacob's tutoring company for 3 years. First he and his excellent staff tutored my oldest son to success for the ACT. Now they are tutoring my youngest to success in a high level high school math class as well as ACT prep.
